Conditional Formatting Practice Questions (Google Sheets)

- **Part 1: Cell / Column Formatting (10 Questions)**

1. Highlight all **Total_Sales > 500000** in the *Total_Sales* column.
2. Apply color to **Unit_Price < 10000**.
3. Highlight cells in *Quantity* where value is **greater than average**.
4. Apply conditional formatting to show **duplicate Order_IDs**.
5. Highlight **blank cells** in the *Salesperson* column.
6. Apply formatting if *Product* contains the word **"Laptop"**.
7. Highlight top **10 highest values** in *Total_Sales*.
8. Apply color scale (gradient) on *Total_Sales*.
9. Highlight values in *Quantity* between **5 and 8**.
10. Highlight cells where *Category = "Electronics"*.

- **Part 2: Row Formatting (10 Questions)**

1. Highlight entire row where **Total_Sales > 400000**.
2. Highlight rows where **Region = "North"**.
3. Apply formatting to rows where **Quantity < 3**.
4. Highlight rows where **Product = "Mobile" AND Quantity > 5**.
5. Highlight entire row if **Unit_Price > 50000**.
6. Apply formatting to rows where **Salesperson = "Amit"**.
7. Highlight rows where **Date is in last 30 days**.
8. Highlight rows where **Total_Sales is maximum in dataset**.
9. Apply formatting if **Category = "Accessories" AND Total_Sales < 100000**.
10. Highlight rows where **Quantity * Unit_Price ≠ Total_Sales** (data validation scenario).
